BANO QABIL AI HACKATHON

Claim Check

Catch the insurance-claim rejection *before* the claim is sent.

Mirza Ahsan Baig · Safee Akmal

Tasdeeq-e-Bima

THE PROBLEM

Claims get rejected for paperwork, not medicine

No pre-authorisation · missing documents · missed deadlines

15%

of US private-insurer claims denied first time[1]

$25.7B

a year spent by US providers fighting denials[1]

86%

of denials potentially avoidable[2]

71%

of India's health-claim value actually paid[3]

Small clinics wait weeks, rework the claim — or stop taking insured patients.

THE PROBLEM · CASE STUDY

Jubilee Health Insurance, Kenya

A CLAIM CAN BE REJECTED FOR…	CLAIM CHECK CATCHES IT BEFORE SENDING
No pre-authorisation (due 48 h before admission)[4]	Asked first, every time
Incomplete documents	Flags missing papers
Discharge summary doesn’t match the approval	Cross-checks the papers
Clinic not on the plan’s panel	Asks panel status
Service not covered by the plan	Plan-coverage check
Filed too late	Filing-deadline check

2020: Nairobi Hospital suspended Jubilee over a claimed **KSh 357 million** in unpaid claims.[5]

THE SOLUTION

A spell-checker for insurance claims

1. **Photograph the papers**
   Qwen reads them; the clerk confirms

2. **Answer 3–4 questions**
   Only what the papers can’t settle

3. **Fix before sending**
   Risk, the cause, the fix, a printout

THE SOLUTION · WHY TRUST IT

Qwen reads and explains. The model decides.

QWEN-VL READS

Every value shown with its source

MODEL + RULES DECIDE

Risk, reason code, checks

QWEN EXPLAINS

One sentence, verified

89%

of claims it cleared were accepted

72%

of rejections caught before sending

3.6

questions per claim

Measured on 362 simulated claims the model never saw.

THE BUSINESS · WHO GAINS

Everyone in the claim wins

CLINICS

- Paid sooner
- Less rework
- Steady cash flow

INSURERS & TPAS

- Cleaner claims
- Fewer appeals
- Lower admin cost

PATIENTS

- Clinics keep accepting insurance
- No paperwork delays

Costs little to run: a small model on an ordinary server, a few short Qwen calls per claim.

THE BUSINESS · HOW IT EARNS

Two revenue streams

TPA LICENCE

- One contract covers every clinic on the panel
- Built into their portal, with their own rules
- Fee per claim checked, or per panel

CLINIC SUBSCRIPTION

- Free: a few checks a month
- Paid: about PKR 3,000–5,000 a month (proposed)
- Costs less than one rejected claim

Next: a 3-month pilot with a TPA or clinic group — rejections measured before and after.
